***Ghandarva Veda is Indian Classical music in it's purest, most original form. It owes it's origin to the ancient sages and seers of India who composed these melodies while in deep meditative states of awareness.***

***It has been noted that by merely listening to this music that stresses melt away. Ghandarva Veda music promotes natural healing and is very rejuvenating, mentally and physically. Many report feeling an increase of inner peace and harmony after listening to this music.***
